

IDENTITY MANAGEMENT IMPLEMENTATION

Our client is a further and higher education institution based in Dorset, United Kingdom, specialising in art, performance, design, and media across the creative industries for over 100 years.

PROJECT CHALLENGE

The organisation was seeking an experienced Service Integrator to implement an identity and access management (IAM) solution based on Microsoft Identity Manager (MIM).

PROJECT NEED

To automate the IAM process, including email and storage accounts, for first year students.

PROJECT SOLUTION

Working closely with the client's internal IT team, Fulcrum IAM Consultants designed the infrastructure and application architecture, and successfully delivered MIM, integrated with SITS, in good time for the new academic year.

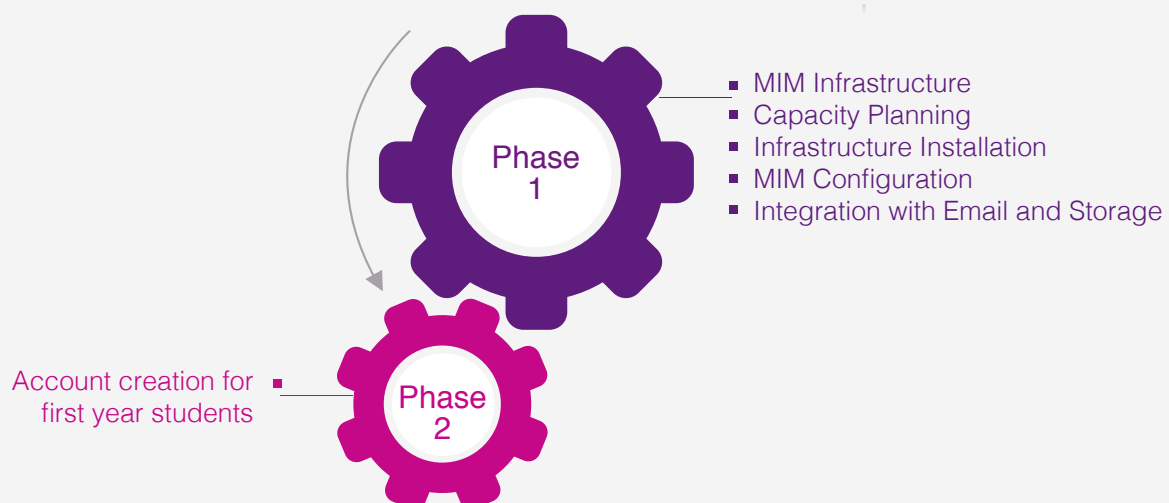

BRIEF

Project Start Date: 4th June, 2018

Project Launch Date: 10th August, 2018

Technology

- Microsoft Identify Manager 2016
- Microsoft Active Directory
- SQL Server 2012 and above
- Visual Studio 2017, .NET Framework
- SITS

Fulcrum proposed a two-phase approach for implementation of Identity Management Solution.
